**Ahmed Allam**  
**Farida Ahmed**

**LABs : Dynamic Routing**

*Course:* **CCNA 200 301 Routing**

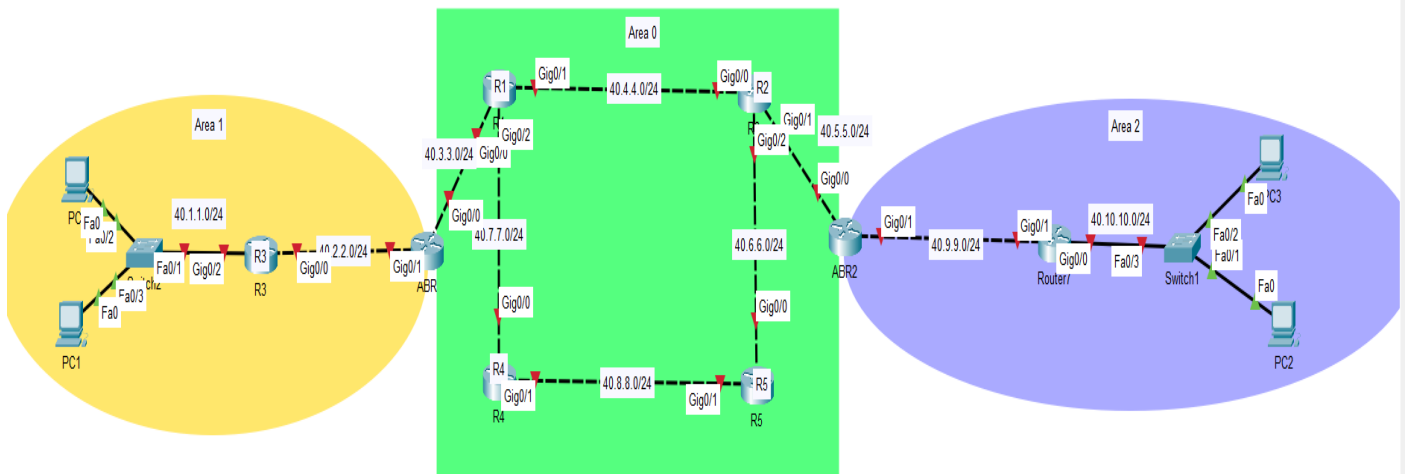

*Team:* **Cipher | Networks Camp**

**20 points**

# LAB1

- Using OSPF protocol routing configuration this network topology and following that.
- Create three areas area 0, area 1, area 2.
  - Detecting R1 is DR using loopback.
  - Detecting R2 is BDR using loopback.
  - Configurations Networks in the fig.
  - Ping between Pcs.

## ❖ Network Topology:

## LAB2

- Using RIP protocol routing configuration this network topology

### ❖ Network Topology:

## LAB3

- Using EIGRP protocol routing configuration this network topology

### ❖ Network Topology:

THANK YOU
